PROJECTS

Pie Planner

- Simple and intuitive day planner iOS app.
- Available on Apple Appstore (https://apps.apple.com/gb/app/pie-planner/id1495555553), 200+ downloads worldwide
- App build with Swift(back-end), SwiftUI(front-end), and CoreData(database)

Interview Scheduler

- React app that allows users to book and manage their interviews. Users can see which interviews are available for the day, and book one of the slot.
- Testing and integration was done using Cypress, Jest and Storybook.

Corona Tracker

- iOS app that displays real-time Coronavirus cases counter with helpful information.
- Cases counts are updated daily from reliable source (John's Hopkins CSSE Github). News are also updated sourced from Google News.
- Ads were implemented from Google Adsense API.
